

Send & Receive Faxes from Anywhere

Complete Your Unified Communications Solution
with Multi-Tech's FaxFinder® Fax Server

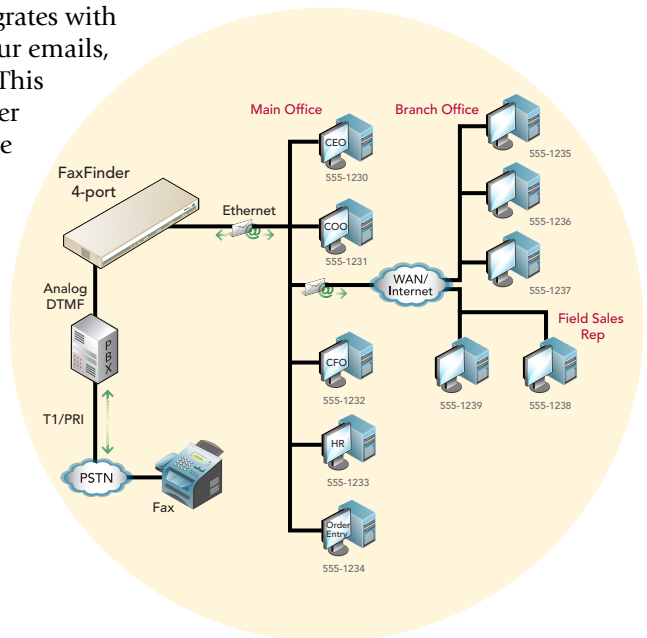

The FaxFinder fax server is an all-in-one fax-to-email server, allowing you to send and receive faxes from any application that can print - and receive them as emails from anywhere.

This affordable and secure solution seamlessly integrates with existing phone systems, allowing you to manage your emails, voicemails, and now faxes, from your email inbox. This provides a high degree of security for both the sender and the receiver, yet the flexibility needed to manage faxes from any location.

Benefits:

- Manage your faxes from anywhere
- One fax server for all your locations and remote workforce
- Eliminate risk of losing faxes
- Everyone can have their own fax number
- Fax privacy/security
- Rapid ROI – Increased production and no paper and toner costs

The FaxFinder fax server seamlessly integrates with existing phone systems, completing your company's unified communications solution.
