

# Fax Server Supports Compliance to Industry Requirements

HIPAA | SOX | GLBA

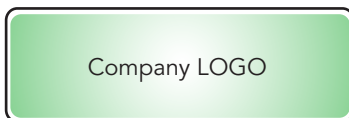

Complying with industry regulations, such as the Health Insurance Portability and Accountability Act (HIPAA), Sarbanes-Oxley (SOX) and Gramm-Leach-Bliley Act (GLBA), requires a secure fax solution. The FaxFinder fax server offers a turnkey way to support compliance to these regulations by:

- *Eliminating need for physical fax equipment*
- *Securely routing faxes to personal e-mail accounts and archiving to secure network folder*
- *Providing control for who receives faxes via administrator features*
- *Tracking and logging sent and received faxed documents for auditing purposes*

The ideal solution for supporting industry regulations that protect patient data and financial information, the FaxFinder® IP fax server provides secure, convenient faxing with a high degree of privacy for both the sender and recipient. Inbound faxes are converted to PDF or TIFF files and delivered to a recipient's in-box or a secure network folder, or printed on a network printer. Outbound faxes can be sent by web client or through Microsoft® Office applications. This all-in-one fax server seamlessly integrates with any PBX system. Plus, the FaxFinder IP saves companies thousands of dollars when compared to online subscription services.
