

Fax Machine Freedom

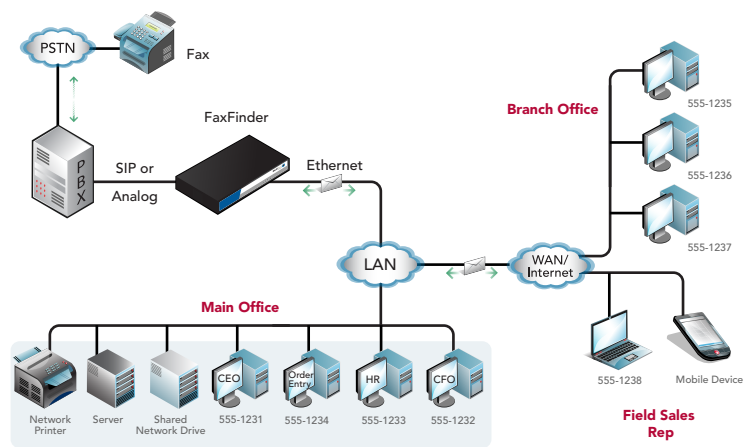

One fax server solution replaces fax machines in all your locations and also improves productivity

Send and receive faxes from your computer or mobile device with the Multi-Tech FaxFinder® Fax Server, a turnkey fax solution for all your locations and remote workers. This affordable and secure solution empowers mobile sales forces and branch offices with the functionality of having a shared fax appliance - allowing you to manage emails - and now faxes - from your email inbox. This provides a high degree of privacy for both the sender and the receiver, as well as the flexibility needed to manage faxes from any location.

Benefit from rapid ROI and enhanced productivity.

- No paper and toner costs
- Save thousands in comparison to fax subscription services
- No additional hardware or software costs
- Eliminate risk of losing faxes
- Everyone can have their own fax number
- Fax privacy/security to support compliance to industry regulations
- Access corporate and personal phonebooks, including Microsoft® Outlook

The FaxFinder V.34 fax server connects to the analog port(s) of a PBX capable of DID-to-DTMF conversion; the FaxFinder IP server connects as a SIP trunk to an IP PBX or a SIP service provider capable of T.38 fax. This all-in-one FaxFinder fax server seamlessly integrates with existing phone systems, completing your company's Unified Communications solution.
